

# Nubart

How our audio guides work

Scan the QR code  
**or**

(for people who are not familiar with QR readers)

enter an alphanumeric code on the museum's website

## Controlled access

via cookie + opt-in-system (LOCP: Lightweight Online Content Protection):

**The first device** has immediate access (cookie)

**A visitor's second device** requires requesting (one-time) an access link via email.

Now the visitor can access the content as often as needed **from any other device**. The access link will always be sent to the given email address.

Access links expire some hours after being used.
